GPS + GSM Vehicle Tracking System

We developed a vehicle tracking system with features such as live tracking, accident detection and rapid response, over-speeding alerts, and car maintenance.

2023 - Current

MERN Developer

I am currently working for my client. I am designing & developing two websites for him .

Travel & Tourism Website features include signup, login, Google & Facebook login, email verification, reset password, delete account, profile page, searching with autocomplete, filtering, admin dashboard, uploading tour packages, detail page, update, delete, approve, reject options for the admin, and more.

E-commerce store features authentication, authorization, an admin dashboard, product and category creation, detail page, cart page, shipping address page, Stripe payment gateway, and many more.

2022 - 20223

SEO Executive

As an SEO Executive at Pakistan Detector Technologies, I primarily focus on On-page activities, including keyword research, content optimization, and technical SEO to ensure website responsiveness, speed optimization, and overall efficiency.

2022 - 2022

SEO Internship

As an SEO intern at Ikonic Dev for **3 months**, I am actively engaged in learning and implementing various SEO strategies, including On-Page, Off-Page, and Technical SEO. My main focus in Off-page work involves creating high-quality backlinks, such as guest post links.
